Profile

I am a cybersecurity professional with a strong foundation in software engineering, currently completing my Master of Science in Information Systems Security at Strathmore University. My work sits at the intersection of secure system design, security operations, and applied research. With experience in software development and IT support, I understand how systems are built, and more importantly, how they can be secured, monitored, and defended. As a Research Scholar and Software Developer at iLabAfrica, I contribute to applied security and innovation-driven projects while strengthening my expertise in defensive security, risk management, and enterprise security architecture. My current Interest: Security Operations Centers (SOC), Cybersecurity Analysis, Information Security Governance, Application Security, Threat Intelligence & Blue Teaming I am open to collaborating on research, security initiatives, and cybersecurity roles where I can contribute to building resilient and secure systems.

Professional Experience

Research Scholar/Software Developer, @iLabAfrica, Strathmore University

Oct 2024 – present | Nairobi, Kenya

- Conducting academic research along with applied research to develop development strategies which lead to scholarly publications.
- Developing web applications with Laravel as backend and Vue as frontend while designing and writing code and performing tests.
- Participating in knowledge-sharing sessions and workshops and training activities at @iLab Africa for academic and practical development.

IT Support Specialist/Junior Engineer, Sqdgo Ltd

Jan 2024 – Sep 2024 | Nairobi, Kenya

- Assisted in tracking and resolving technical issues across mobile and web platforms; contributed to operational monitoring and reporting at Sqdgo Ltd.
- Worked closely with the operations team to ensure the smooth running of daily operations of Sqdgo.
- Onboarded over 100 drivers and other users by checking validity of their documents to facilitate their approval into the platform.
- Worked closely with the operations team to deliver on any IT/tech related assignments assigned to me.
- Worked closely with the CTO to debug the apps whenever there was a reported issue.
- Accomplished software-related duties delegated to me by the CTO.
- Worked closely with other team members including the Sales and Marketing team and Senior Management to help the company successfully pilot during their operations, and
- Other duties, as called for by the management team.

IT Support, Sqdgo Ltd

Sep 2022 – Dec 2023 | Nairobi, Kenya

- Onboarded drivers and riders by checking validity of their documents to facilitate their approval into the platform.
- Worked closely with the operations team to deliver on any IT/tech related assignments assigned to me.
- Worked closely with the CTO to debug the apps whenever there was an issue reported.
- Accomplished software-related duties delegated to me by the CTO.
- Worked closely with other team members including the Sales and Marketing team and senior management to help the company successfully pilot during their operations.
